Nodejs	React	Mongodb
Postgres		

Professional Experience

Metrostudy : Junior Web Developer Sept. 2018 - present
Irvine, California/Remote Position

- Continuously collecting and adding new data on existing housing trends through a data management application
- Logging and implementing various bug fixes on existing project files when necessary

Additional Projects

Fitness Application Dec. 2017 - Sept. 2018

- Created an application that features user profiles, including registration and authentication
- Utilized MongoDB for storing client data and retrieving user profiles
- Refactored the user interface using React.js for cleaner, simpler functionality

Personal Website Dec. 2017 - present

- Redesigned website from the ground up using Bootstrap and React.js
- Added user authentication and created several reusable components
- Later implemented a blog that utilizes Node.js and MongoDB
